- LDPC-based space-time coded OFDM systems over correlated fading channels: analysis and receiver design**
 Lu, B.; Xiaodong Wang; Narayanan, K.R.
[Communications, IEEE Transactions on](#)
 Volume: 50 Issue: 1 Jan 2002
 Page(s): 74-88
 Digital Object Identifier 10.1109/26.975756
Summary: We consider a space-time coded (STC) orthogonal frequency-division multi-system with multiple transmitter and receiver antennas over correlated frequency- and fading channels. It is shown that the product of the time-sele....

- Low-density parity-check codes for digital subscriber lines**
 Eleftheriou, E.; Olcer, S.
[Communications, 2002. ICC 2002. IEEE International Conference on](#)
 Volume: 3 2002
 Page(s): 1752- 1757 vol.3
 Digital Object Identifier 10.1109/ICC.2002.997149
Summary: The paper investigates the application of low-density parity-check (LDPC) subscriber-line (DSL) transmission systems that employ discrete multitone modulation linear-time encodable binary LDPC codes that are well-suited....

- Low-density parity-check codes for multilevel modulation**
 Eleftheriou, E.; Olcer, S.
[Information Theory, 2002. Proceedings. 2002 IEEE International Symposium on](#)
 2002
 Page(s): 442-
 Digital Object Identifier 10.1109/ISIT.2002.1023714
Summary: The application of low-density parity-check (LDPC) codes to multilevel mo is studied. A family of binary LDPC codes that offer good performance and do not suffi effects at low bit-error rates is introduced. A number....
